StealthBar Quick Start Guide
AirPlay and Wi-Fi setup and operation

Note:
- *When using the Sound-bar for the first time, please follow the steps below for your Airplay and Wi-Fi connection. This connection process only needs to be done once. After the setup is completed successfully simply turn on the Sound-bar and it will find and connect to the Wi-Fi automatically.*
- *Once you set up the Sound-bar's system on your home Wi-Fi network, you can control the system from any compatible smartphone/tablets/computers on the same network.*
- *If you restore of the Wi-Fi settings to their default values, please re-connect the player to your home Wi-Fi network.*

- Connecting the network with your IOS or Mac OS X device via WAC.
WAC (Wireless Accessory Configuration): Apple's Wireless Accessory Configuration feature is designed to allow consumers to simply set up their wireless accessories with the network credentials already stored on their iOS or OSX device.
| User requirements for using Wireless Accessory Configuration	
Hardware	**Network**
• Wireless Accessory Configuration requires a device running iOS version **7.0** or greater or OSX **10.9** with AirPort Utility **6.3.1** or greater to act as the configuring device. (If the version is too low, please Upgrade your Apple device or use <u>**Option B**</u> to setup network)	• Wireless Accessory Configuration requires a wireless TCP/IP network connection between the configuring device and accessory. The Wireless Accessory Configuration enabled accessory must be able to act as both a software Access Point (AP) and as a station (STA) device.
• A Wireless Accessory Configuration enabled accessory with Wi-Fi.	• Target wireless networks require: an access point compatible with 802.11b/g, 802.11n, or 802.11ac.

- Ensure the wireless router is available.

1 When the Sound-bar is ON, press the **SOURCE** button on the Sound-bar repeatedly or the **AIRPLAY** button on the remote control to select the **AIRPLAY** mode. The Wi-Fi indicator flashes very fast.
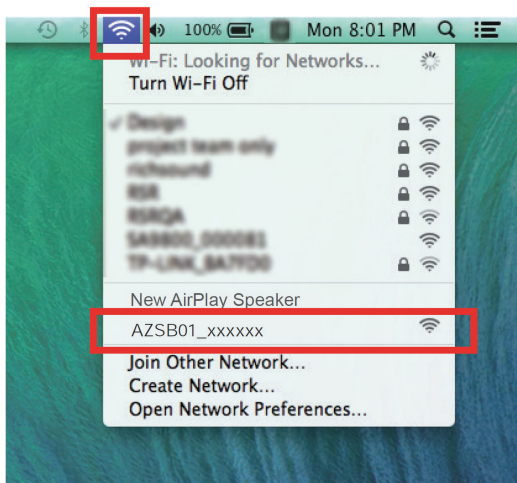

2 Sound-bar enters into the **WAC** mode. Then the Wi-Fi indicator flashes rapidly.

- Or Press and hold **AIRPLAY** button on the remote control for a few seconds to switch the Sound-bar to the **WAC** mode until the Wi-Fi indicator flashes rapidly.

3 Use your Apple devices to search for Wi-Fi network (also known as WLAN).
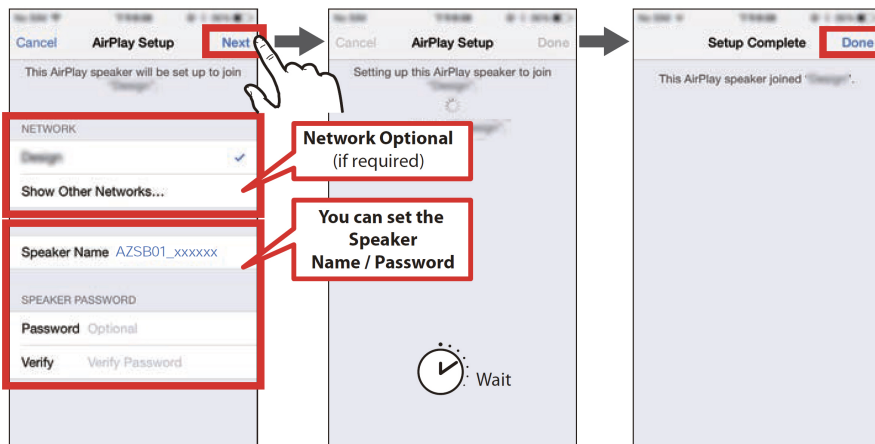

iOS 7.0   OSX 10.9

- "AZSB01_xxxxxx" (xxxxxx: MAC address) will appear on your available Wi-Fi
  network list of new airplay speaker

  3 Select "AZSB01_xxxxxx" and follow the on-screen instructions to connect to your
    Home Wi-Fi network

Network Optional
(if required)

**You can set the
Speaker
Name / Password**

Wait

  5 Your Sound-bar is now connected to your home Wi-Fi network

- For how to stream music from your smartphone to this player and playback
  (See Listen to music from Wi-Fi device in the manual)

- If the connection fails, please check that your home Wi-Fi network is available and
  repeat steps 1 to 4 to reconnect your home Wi-Fi network.

Please refer to manual for alternate setup guide and options.
